

Final Showcase Evidence Packet

The final is a bounded evidence defense, not a polish contest or proof of production readiness. Draft fields across both meetings; use one or two concise sentences per field.

STUDENT NAME	SHOWCASE ROUTE	ARTIFACT TITLE OR CLASS-SAFE LABEL
Never saved	Not selected	No private path

Equal-credit routes: no public URL, prior app or packet, live AI, account, paid tool, reliable network, spoken performance, video recording, polished interface, personal career disclosure, or certificate is required. Request a private or alternate route without explaining a diagnosis.

1. Purpose and bounded capability claim

USER AND TASK	BOUNDED CAPABILITY CLAIM
ARTIFACT BOUNDARY: WHAT IT IS AND IS NOT	EVIDENCE ROUTE AND CLAIM STATUS
	Not classified

2. Visible demonstration plan

INPUT / START What will the reviewer first see?	ACTION What bounded interaction or record is shown?	OUTPUT What visible result supports the claim?	LIMIT What will this demonstration not establish?
INPUT OR STARTING STATE	ACTION AND OUTPUT		
FALLBACK IF THE PRIMARY ROUTE FAILS	PUBLIC-DISPLAY CHECK: WHAT IS DELIBERATELY HIDDEN OR OMITTED?		

Presenter control: never project credentials, private prompts or chats, account/device screens, private paths, grades, health or identity data, consent/assent records, unpublished peer work, or notifications. Switch to the fallback immediately if private content appears.

Process, claim, and human-control evidence

Each record names the evidence route and limitation. Recreate with Study Sprint if a prior packet is unavailable.

3. One human process decision

BEFORE OR INITIAL PROPOSAL

DECISION: WHAT YOU CHANGED, COMBINED, SIMPLIFIED, OR REJECTED

EVIDENCE OR REASON

RESULT AND REMAINING TRADEOFF

4. One claim and source trail

EXACT CLAIM

SOURCE OR DIRECT-OBSERVATION IDENTITY

EXACT SUPPORT OR VISIBLE OBSERVATION

STATUS + ADDITIONAL CHECK OR BLOCKED REASON

CLAIM LIMITATION

5. One security, privacy, safety, or human-control decision

BOUNDED CLAIM OR FINDING

VISIBLE EVIDENCE AND ROUTE

HUMAN APPROVAL, PRIVACY, OR STOP BOUNDARY

KNOWN LIMITATION + NEXT TEST OR STOP CONDITION

Calibration: a source, screenshot, test, scan, AI suggestion, or supplied record supports only the claim it actually addresses. Do not claim complete accuracy, safety, security, effectiveness, accessibility, or production readiness.

Make collaboration and revision visible

Citation/source records and assistance disclosure are separate jobs. No full chat or peer identity is required.

6. Assistance disclosure or no-AI statement

TOOL OR PERSON + TYPE OF HELP

WHAT YOU CHANGED, COMBINED, SIMPLIFIED, OR REJECTED

HOW YOU PERSONALLY CHECKED IT

DECISION AND RESPONSIBILITY THAT REMAIN HUMAN

No-AI route: state that no AI was used and name any course, peer, instructor, accessibility, or other human support that materially shaped the work. Do not disclose a disability or private support context.

7. One anonymous feedback record

NOTICE: VISIBLE EVIDENCE THE REVIEWER COULD FOLLOW

QUESTION: CLAIM, SOURCE, OR BOUNDARY NEEDING CLARIFICATION

NEXT TEST: ONE BOUNDED SUGGESTION

YOUR DECISION

Not reviewed

WHY THE FEEDBACK FITS OR CONFLICTS WITH THE GOAL, EVIDENCE, SCOPE, PRIVACY, OR AUTHORITY

Reviewer unavailable: use the fixed Study Sprint dossier comment, structured self-review, or instructor review for equivalent evidence. Do not invent a peer identity.

8. Bounded revision or justified no-change decision

BEFORE

AFTER OR NO-CHANGE DECISION

EVIDENCE AND TRADEOFF

WHAT REMAINS UNCHANGED AND WHY

Peer privacy: summarize the feedback without a name, grade, contact detail, private conversation, or personality judgment.

Question response, limitation, and next step

The observable submission ends with a calibrated answer. Private course reflection remains separate unless the LMS explicitly requests it.

9. One difficult reviewer question

QUESTION ABOUT EVIDENCE OR BOUNDARY	ANSWER
EVIDENCE SHOWN	UNCERTAINTY, LIMIT, OR NEXT CHECK

10. Final calibrated close

KNOWN LIMITATION	NEXT TEST, ACTION, QUESTION, OR STOP CONDITION

11. No-secrets and route statement

STATE WHAT ROUTE YOU USED, WHAT WAS SHOWN, AND HOW PRIVATE OR RESTRICTED CONTENT WAS KEPT OUT. DO NOT REPRODUCE SENSITIVE CONTENT.

12. Submission check if assigned in the LMS

Observable evidence	Status	Missing, blocked, or alternate-route note
Purpose, bounded claim, demonstration route	Not checked	
Process, source/claim, human-control evidence	Not checked	
Disclosure, anonymous feedback, revision	Not checked	
Question response, limitation, next step, privacy check	Not checked	

If assigned: submit this packet, a rendered Rehearsal Studio summary, LMS text, DOCX/export, scanned paper, speech-to-text, an augmentative and alternative communication (AAC) supported response, or another approved equivalent. You may use the Studio to draft this packet, but submit one final format only. The LMS supplies points, deadline, late rules, accepted upload type, and resubmission. Private reflection is not automatically part of this observable record.
